

The ordinary citizens of this country will be slaughtered because this country is allowing dishonest, untruthfulness and corrupted officials to take over our government at every level.

Week after week there is more and more evidence that not only this GX/ STT deal is a SCAM, but it is very dangerous to the national security of the United States of America. It is a mockery that our government is saying they are fighting terrorists; but at the same time giving away this network which is needed to transmit sensitive and secured information claiming to the benefit of the American consumers. Imagine allowing a foreign entity not to pay "honest debt" to cut down the operating cost so as to cut down unit cost to have a price war in the telecom industry to benefit the consumers. Whatever benefit to the consumers will result in massive loss of jobs and buying power. Is this the way to benefit consumers? My suggestion to benefit consumers and provide them with massive buying power is to ask the banks to forgive their mortgages as the Global Crossing forgave the loans from its CEO John Legere.

Hope there will be justice in our system, not the reversed Robinhood function, that is rob the poor and give to the RICH!!
